DEFINITIONS

COVERED EMPLOYER
Employers other than agricultural or domestic:

To be a covered employer, an employer must meet one or more of the following criteria:
- have an annual payroll which exceeds $1,000 in a calendar year
- acquire all or a substantial portion of a covered business or
- be subject to FUTA

Agricultural and domestic employers:

If the employer is an agricultural entity, the employer must pay total cash wages of $20,000 or more in a calendar quarter or employ 10 or more workers in 20 different weeks in a calendar year to be covered.

A domestic employer who pays total cash wages of $1,000 or more in a calendar quarter is a covered employer.

In addition, if the agricultural or domestic employer has another business which is covered, the employer must also report its agricultural or domestic employees, regardless of the amount of wages paid or number of employees.

COVERED EMPLOYMENT
Covered employment includes all services performed for wages or under contract, unless specifically excluded by law.
Some common exclusions from covered employment are:
- individuals in the employ of that individual's son, daughter or spouse
- children under 21 employed by parent (or partnership of parents)
- real estate, insurance and securities salespeople paid solely by commission and without guaranteed earnings
- fulltime students working in a program taken for credit
- inmates working for a state correction or custodial institution
- elected public officials
- railroad employees
- church employees
- children under 18 delivering and distributing newspapers or shopping news from house to house and business establishments
- physically or mentally impaired individuals working in a rehabilitation facility

STANDARD INDUSTRIAL CLASSIFICATION (SIC CODE)
Each business is assigned a (SIC) code that describes the business based upon its nature-of-business in accordance with the Standard Industrial Classification Manual, 1987 edition.

ESTABLISHMENT
Employment for a given month is the number of workers covered under the Montana unemployment insurance laws who earned wages from a reporting unit during the pay period which includes the 12th day of the month.

GROSS WAGES
Gross wages, as reported on the quarterly contribution report of employers covered by the unemployment insurance law, are the total amount of compensation paid by the employer during the quarter.

DISCLOSURE RESTRICTIONS
Publication of employment and wage data is withheld for any industry level which consists of fewer than three reporting units or in which a single establishment accounts for 80 percent or more of the industry's employment.

AVERAGE WEEKLY WAGE (AWW) is derived from the total wages of all reported employees of any industry or major group, the average monthly employment for that industry or group during the week of the 12th of each month and the number of weeks in the quarter.

Average Weekly Wage is affected by large bonuses, overtime, pay premiums, part-time employment, commissions, etc. These may drastically raise or lower the statewide or county level figure.

AWW is given as a statistical figure which can be used with current employment data to evaluate and better understand the economic position of an industry or major group.

It is not the size of the average employee's paycheck.

THIRD QUARTER, 1989, IN REVIEW

Generally, third quarter employment was up from third quarter 1988. Employment in Services and Retail Trade was up 6.4% and 3.8% respectively. Services with 71,564 covered workers was the largest industry in the State. Retail Trade, employing 64,332, was second. Manufacturing employment showed the largest percentage growth with an increase of 7.6% or 1,623 covered workers over last year. Total employment in Private Industry was 226,120 in third quarter 1989.

Private Industry average wages of $312/week in the quarter were .6% higher than third quarter wages of one year ago. Wages in nearly all industry groups were up over the previous year. Only Mining, Finance, Insurance and Real Estate, and Services wages were slightly lower. Finance, Insurance and Real Estate showed a 4.3% average wage decline from 1988 wages. This was due for the most part to a large average wage decline in Holding and Investments (SIC 67). The wages reflected in third quarter 1989 in this industry group were a return to normal average weekly wages.

The number of business establishments increased to 24,449, up from 24,353 in third quarter 1988. However, Mining and Construction establishments were fewer by 39 and 124 respectively. Retail Trade, with 83 new reporting establishments, showed an increase of 1.3% over the 1988 third quarter figure.

EMPLOYMENT & WAGE COMPARISON GRAPHS

The graphs on the following pages (by major industry group) compare employment and wages for the years 1985, 1986, 1987, 1988 and 1989.

Note that seasonal industries in Montana include Agriculture, Forestry and Fishing; Construction; Manufacturing (due to logging); Real Estate; and Services (due to the tourist trade). Also, there is a large drop in Government employment during the summer months when public schools are closed.

Agricultural Production - Livestock (SIC 02) employment increased 79 workers over the previous quarter.

Average weekly wages were down from second quarter 1989 wages. Forestry (SIC 08) average wages of $274/week were $100/week lower than in the prior quarter. Wages in Agricultural Production - Livestock (SIC 02) were $223/week or $11/week lower than the previous quarter.
